

HIS PATH HIS WAY HIS NAME

A Building for People and the Glory of God

THE STORY

Beginnings - God and People

The story begins with people devoting themselves to God and one another in lawn chairs at Guier Fence, on bleachers in Valley View, in life group living rooms, at retreats, in Mercy Ministry homes, and around fellowship tables sharing meals. The story has always been about the devotion to God and people.

Property Vision - A Hub for People

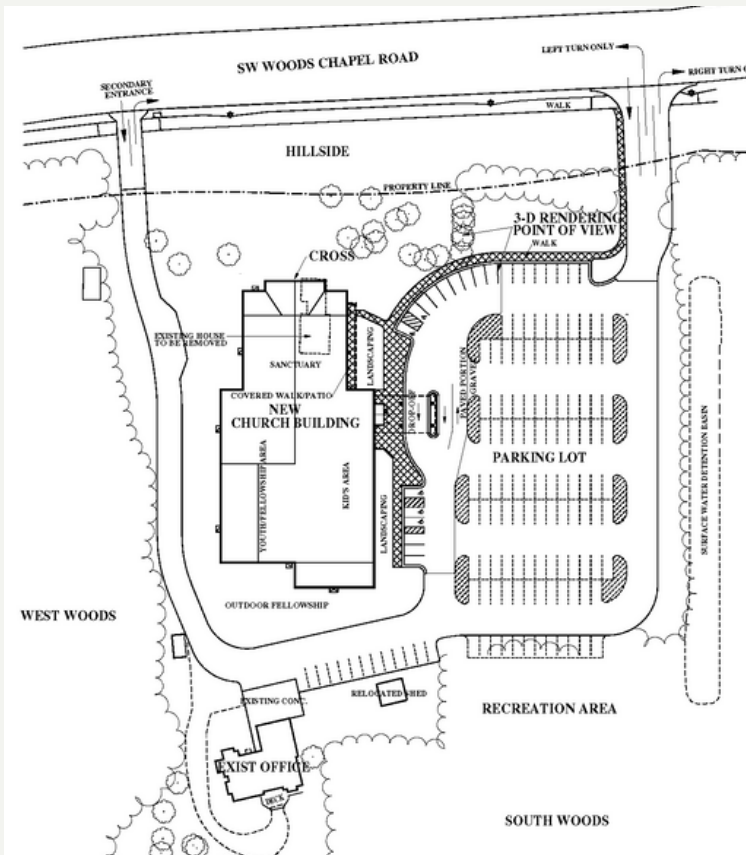

The purpose of the church property was about having a central hub for people to gather and do life together. The vision had features like a sanctuary and amphitheater for worship, trails for walking and praying, and yard space for recreation fun. This was a vision for people to encounter God and other people.

Returning to the Vision

So why didn't we build when we bought the property 10 years ago? The short answer is... God didn't allow it. It wasn't time yet. People came and people went, leaders changed, and visions left. People celebrated and people wept. Lives were changed and lives were kept. A lot has happened in those 10 years, but it wasn't time to build yet. But now here we are, after scouring the city for building purchases and building leases. After prayer walks and much discernment, we now have official plans in our hands for the property to once again be a hub for people to encounter God and others.

A Building for People and God's Glory

The building is not the end of the story but the building's end is people. The building serves as a refuge for people to gather continually, a place for people to receive mercy, a place where people celebrate, a place for recreational fun, a place where people worship and find redemption, a place where people learn truth and find freedom, a place where people Sabbath, Disciple, and are sent out from. A place where people glorify God through life together.
